

# COMP 200 & COMP 130

## Assignment 0: About yourself

The goals of this assignment are to

- Let us know a bit more about you.
- Make sure you are familiar with reading assignments and posting solutions on OWL-Space.

This assignment is not graded. There is no need to exaggerate your answers, as we want an accurate picture of the students.

1. Include your given name (that appears on the roster) and your preferred name, if different.
2. What are your classification and intended major(s) – e.g., a freshman CS major, a sophomore CogSci major?
3. Why are you taking this course?
4. What do you hope to get from this course?
5. Briefly describe what experience you've had with computers, programming, math, logic, and probability.
6. Briefly describe something interesting or fun about yourself, so that you aren't just a name on the roster.

Submit your answers on OWL-Space in the Assignments section under Assignment 0. Upload them in a single Adobe Acrobat (PDF) or Microsoft Word (DOC or DOCX) file.
