COMP 506, Spring 2018
Final Exam

The midterm exam will cover all of the material presented in lecture, starting with the "Software Stack" Lecture (number 14 on the web site, below the line).
It will also cover the following sections in the book:

       Chapter 5 in EaC2e (lecture 7 on the web site)
       Chapter 8 in EaC2e
       Chapter 9, Sections 9.1, 9.2, and 9.3
       Chapter 10, Sections 10.2, 10.5, and 10.6.1
       Chapter 12, Sections 12.1, 12.2, 12.3, and 12.4

The exam will **not** cover material that was covered by the midterm, except for chapter 5. I will, however, assume that you know that material as background for some of the questions.

The exam will a take home exam. You will have up to three hours to complete the exam.
It is a closed-book, closed-notes, closed-devices exam. During the exam, you may not consult any sources other than the knowledge you have in your head.
