

# Contents

<b>Preface</b> .....	iii
<b>Notation</b> .....	iv
<b>1. Introduction</b> .....	<b>1</b>
1.1 Finite Element Methods .....	1
1.2 Capabilities of FEA .....	3
1.3 Outline of Finite Element Procedures .....	7
1.4 Assembly into the System Equations .....	12
1.5 Error Concepts .....	21
1.6 Exercises .....	22
1.7 Bibliography .....	24
<b>2. Mathematical Preliminaries</b> .....	<b>26</b>
2.1 Introduction .....	26
2.2 Linear Spaces and Norms .....	28
2.3 Sobolev Norms* .....	29
2.4 Dual Problems, Self-Adjointness .....	29
2.5 Weighted Residuals .....	31
2.6 Boundary Conditions Terms .....	35
2.7 Adding More Unknowns .....	39
2.8 Numerical Integration .....	39
2.9 Integration By Parts .....	41
2.10 Finite Element Model Problem .....	41
2.11 Continuous Nodal Flux Recovery .....	56
2.12 A One-Dimensional Example Error Analysis .....	59
2.13 General Boundary Condition Choices .....	67
2.14 General Matrix Partitions .....	69
2.15 Elliptic Boundary Value Problems .....	70
2.16 Initial Value Problems .....	77
2.17 Equivalent Forms* .....	82
2.18 Exercises .....	85

2.19	Bibliography .....	89
<b>3.</b>	<b>Element Interpolation and Local Coordinates</b>	
3.1	Introduction .....	91
3.2	Linear Interpolation .....	91
3.3	Quadratic Interpolation .....	95
3.4	Lagrange Interpolation .....	96
3.5	Hermitian Interpolation .....	97
3.6	Hierarchal Interpolation .....	100
3.7	Space-Time Interpolation * .....	105
3.8	Nodally Exact Interpolations * .....	105
3.9	Interpolation Error * .....	106
3.10	Gradient Estimates * .....	109
3.11	Exercises .....	112
3.12	Bibliography .....	114
<b>4.</b>	<b>One-Dimensional Integration</b> .....	<b>115</b>
4.1	Introduction .....	115
4.2	Local Coordinate Jacobian .....	115
4.3	Exact Polynomial Integration * .....	116
4.4	Numerical Integration .....	118
4.5	Variable Jacobians .....	122
4.6	Exercises .....	125
4.7	Bibliography .....	125
<b>5.</b>	<b>Error Estimation for Elliptic Problems</b> .....	<b>126</b>
5.1	Introduction .....	126
5.2	Error Estimates .....	130
5.3	Hierarchical Error Indicator .....	131
5.4	Flux Balancing Methods .....	135
5.5	Element Adaptivity .....	137
5.6	H Adaptivity .....	138
5.7	P Adaptivity .....	138
5.8	HP Adaptivity .....	139
5.9	Exercises .....	140
5.10	Bibliography .....	142
<b>6.</b>	<b>Super-convergent Patch Recovery *</b> .....	<b>145</b>
6.1	Patch Implementation Database .....	145
6.2	SCP Nodal Flux Averaging .....	157
6.3	Computing the SCP Element Error Estimate .....	163
6.4	Hessian Matrix * .....	165
6.5	Bibliography .....	175

<b>7. Variational Methods</b> .....	<b>177</b>
7.1 Introduction .....	177
7.2 Structural Mechanics .....	178
7.3 Finite Element Analysis .....	179
7.4 Continuous Elastic Bar .....	184
7.5 Thermal Loads on a Bar * .....	191
7.6 Reaction Flux Recovery for an Element * .....	195
7.7 Heat Transfer in a Rod .....	198
7.8 Element Validation * .....	201
7.9 Euler's Equations of Variational Calculus * .....	207
7.10 Exercises .....	209
7.11 Bibliography .....	212
<b>8. Cylindrical Analysis Problems</b> .....	<b>214</b>
8.1 Introduction .....	214
8.2 Heat Conduction in a Cylinder .....	214
8.3 Cylindrical Stress Analysis .....	224
8.4 Exercises .....	228
8.4 Bibliography .....	228
<b>9. General Interpolation</b> .....	<b>230</b>
9.1 Introduction .....	230
9.2 Unit Coordinate Interpolation .....	230
9.3 Natural Coordinates .....	238
9.4 Isoparametric and Subparametric Elements .....	240
9.5 Hierarchical Interpolation .....	247
9.6 Differential Geometry * .....	251
9.7 Mass Properties * .....	256
9.9 Interpolation Error * .....	257
9.9 Element Distortions .....	259
9.10 Space-Time Interpolation * .....	260
9.11 Exercises .....	262
9.12 Bibliography .....	263
<b>10. Integration Methods</b> .....	<b>264</b>
10.1 Introduction .....	264
10.2 Unit Coordinate Integration .....	264
10.3 Simplex Coordinate Integration .....	266
10.4 Numerical Integration .....	269
10.5 Typical Source Distribution Integrals * .....	272
10.6 Minimal, Optimal, Reduced and Selected Integration * .....	275
10.7 Exercises .....	278

10.8	Bibliography .....	279
<b>11.</b>	<b>Scalar Fields .....</b>	<b>280</b>
11.1	Introduction .....	280
11.2	Variational Formulation .....	280
11.3	Element and Boundary Matrices .....	283
11.4	Linear Triangle Element .....	288
11.5	Linear Triangle Applications .....	290
11.6	Bilinear Rectangulars * .....	315
11.7	General 2-D Elements .....	317
11.8	Numerically Integrated Arrays .....	318
11.9	Strong Diagonal Gradient SCP Test Case .....	321
11.10	Orthotropic Conduction .....	336
11.11	Axisymmetric Formulations .....	343
11.12	Torsion .....	349
11.13	Introduction to Linear Flows .....	355
11.14	Potential Flow .....	355
11.15	Axisymmetric Plasma Equilibria .....	362
11.16	Slider Bearing Lubrication .....	367
11.17	Transient Scalar Fields .....	373
11.18	Exercises .....	376
11.19	Bibliography .....	380
<b>12.</b>	<b>Vector Fields .....</b>	<b>382</b>
12.1	Introduction .....	382
12.2	Displacement Based Stress Analysis .....	382
12.3	Planar Models .....	387
12.3.1	Minimum Total Potential Energy .....	389
12.3.2	Displacement Interpolations .....	389
12.3.3	Strain-Displacement Relations .....	391
12.3.4	Stress-Strain Law .....	391
12.4	Matrices for the Constant Strain Triangle .....	392
12.5	Stress and Strain Transformations * .....	404
12.6	Axisymmetric Solid Stress * .....	409
12.7	General Solid Stress * .....	411
12.8	Anisotropic Materials * .....	411
12.9	Circular Hole in an Infinite Plate .....	414
12.10	Exercises .....	427
12.11	Bibliography .....	428
